

Tennis live internet match updates

Live tennis match updates can be generated for posting to your web site. Select Match entry | Reports to access the live match updates functions.

The screenshot shows a web application window titled "TAS Tennis - Results entry". It has a menu bar with "Match identification", "General info", "Singles results", "Doubles results", and "Reports". Below the menu are two buttons: "Box score" and "Pre-match info". The main content area is titled "Live box score setup" and contains two buttons: "Send live match update (FTP)" and "View match update Html". Below these buttons are several input fields: "Home logo:" with the value "bary.gif", "Visitor logo:" with the value "lynn.gif", an unchecked checkbox "Indicate match is 'Final'", "FTP host name:" with the value "ftp.hostname.edu", "FTP userid:" with the value "userid", "FTP password:" with a masked password, and "Directory:" with the value "tennis/live". At the bottom right of the window are three buttons: "Done", "Apply", and "Cancel".

Send live match update (FTP): Click to transmit live match update (requires TasFtp).

View match update Html: Click to view the local match update Html file in your browser.

Home logo: Optionally enter the home logo image reference to insert into the Html file.

Visitor logo: Optionally enter the visitor log image reference to insert into the Html file.

Indicate match is 'Final': Enable this option to display "FINAL" on the Html page.

FTP host name: Enter the host name or IP address of the FTP server.

FTP userid: Enter the FTP login userid.

FTP password: Enter the FTP login password.

Directory: Enter the directory to transmit the live match update to.

Note: To use the "Send live match update (FTP)" function you must have TasFtp installed. Alternatively you can use the "View match update Html" function and use a local FTP tool to transfer the updated Html file to your server.

After setting up FTP information, use the following procedure to post live match updates:

1. Use the Singles or Doubles page to update match scores.
2. When a match is complete, click on the ">>>" details button for the match and fill in the "Order of finish" field (this causes the team score to be updated on the live page).
3. Click on Reports | Send live match update (FTP) to transmit the updated scores.

Sending to multiple sites

TasFtp can now transmit a primary site/server, and to a secondary site. To do this:

For the Html site select Game Reports | Live | Live setup. Supply the FTP settings for the primary FTP site. Then run Start | Programs | TasFtp | TasFtp, click the "2nd FTP site" button, and supply the FTP settings for the secondary FTP site. Check the "Enabled" button to make this setting active.

Support for SFTP

TasFtp now support transmitting via the SFTP protocol. To do this, run Start | Programs | TasFtp | TasFtp, click the "FTP setup" (or "2nd FTP site") button, and enable the "Use secure FTP (SFTP)" option.
